## Mastership in Chemical Analysis Examination

### Training Guide

*Legislation*  
(2003 Edition)

## ACKNOWLEDGEMENTS

This guide has been prepared by the Training Committee of the Association of Public Analysts. Although all Committee members have contributed in various ways by checking relevant legislation from the United Kingdom and the European Community or in editorial work, the main database and its upkeep and presentation are the responsibility of C M Hunt, and this work is gratefully acknowledged.

The Training Committee membership during the preparation of this fourth edition of the booklet included the following:

P Hancock  
C M Hunt (Secretary)  
C McDonald (Chairman)  
C R Stevens  
K J Swan

Web edition April 2003

It will be noted that some of the references under EC Directives are printed in Italics. This indicates that such documents are Regulations rather than Directives.

## FOREWORD

This training guide is one of a series produced by the Association of Public Analysts for use in the profession. It is particularly directed at candidates preparing for the Mastership in Chemical Analysis (MChemA) examination.

The MChemA is the qualification prescribed by the Food Safety (Sampling and Qualifications) Regulations 1990 for a person to be appointed as a Public Analyst in the United Kingdom. These regulations also provide that the MChemA is an authorised qualification for a person to practice as a Food Examiner. Responsibility for the examination and the award of a Mastership remain with the Royal Society of Chemistry, from which copies of current regulations and syllabus for the examination may be obtained.

Candidates using this book should be alert to the following matters.

1. The lists of legislation presented here are not intended to be a comprehensive coverage of all instruments in the topic areas. Rather, the entries reflect the Training Committee's view of instruments that should be studied, and it is acknowledged that examiners may take a slightly different view. Also, the Committee has refrained from grading entries according to their importance or peripheral interest for Public Analysts or Food Examiners; that judgement must be for the candidate and his/her counsellors.
2. Although the Committee has considered the special needs of candidates working in Scotland, Northern Ireland and other places as regards legislation, a decision has been taken not to include instruments issued specifically for those areas.
3. New and amending regulations/directives, both UK and EC, on any given topic often amend more than one regulation or directive on an entirely different topic within that general subject area. Thus, for example the Miscellaneous Food Additive Regulations 1995 amend many regulations, including those on Cocoa and Chocolate Products, Jam and Similar Products, and Fruit Juices and Fruit Nectars. Hence, candidates need an overview of relevant legislation in order to know the up-to-date content of any act or statutory instrument.

Other training guides published by the Association of Public Analysts include the 'Study Guide for the MChemA', 'Candidate's Record of Professional Training and Experience', 'Microscopy (2<sup>nd</sup> Edition)', 'Certificate Writing', and 'Food Complaints' and 'Labelling of Food, Bottled Water and Agricultural Materials'. This guide on 'Legislation' complements the series. However, statutes and regulations within the United Kingdom and European Community are frequently amended or consolidated and new instruments are being introduced, and therefore it is necessary to update the legislation guide on a more frequent basis than is required for the other publications.

The guide was first published in December 1990; a second edition was issued in March 1993, a third in March 1996 and a fourth in 1999. This web edition will be monitored and revised on an annual basis. **The Training Committee would welcome corrections to the text and suggestions for improvements to future editions.**

C McDonald  
Training Committee Chairman  
Association of Public Analysts
